Sorbent Products

HOW TO USE THE Oil Only Sponge™ SORBENTS

THE Oil Only SPONGE™ sorbents are the easiest, most cost effective way to remove oil from water in plant or out. These lightweight sorbents absorb up to 20 times their weight in oil. They continue to float when fully saturated. They repel water but soak up petroleum based fluids.

HERE ARE SOME OF THE MANY WAYS TO USE THE OIL ONLY SPONGE PRODUCTS:

Note: For best results, fluff up the sorbent filler material which may have compressed during shipment.

1. PLACE IN COOLANT TANKS AND FLUID RESERVOIRS.

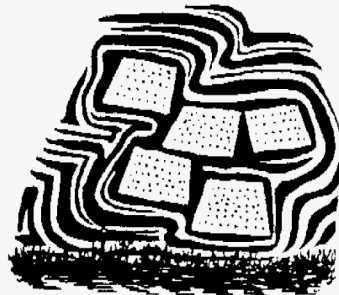

Oil only SUCKERS and SNAKES absorb tramp oil, "rainbow sheen," prevent rancidity, and eliminate bacteria build up. They actually repel water but absorb oil.

Loop is attached for easy retrieval.

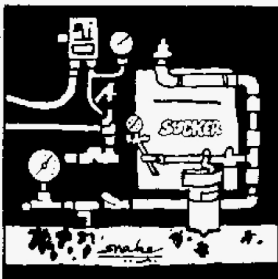

2. WATER SURFACES CLEANSED OF OIL.

Oil Only MATS skim floating oil from the surface of water. Fast wicking action soaks up oil and keeps it from spreading.

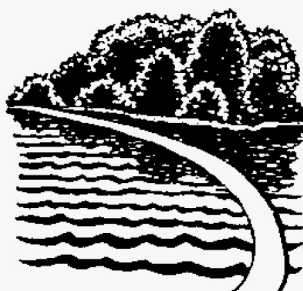

3. PLACE UNDER TROUBLESOME LEAKERS

An Oil Only SNAKE and SUCKER absorb the oil but allow washdown water or rain to pass through. Thus, the water is cleansed of oil before it reaches drains.

4. CAPTURE ANY SPILLED OIL

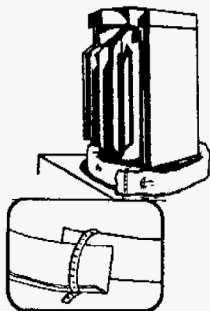

Oil Only SWEEPS are attached to a polypropylene rope which allows the SWEEP to be dragged over the water's surface or remain stationary on moving water to capture and absorb spilled oil.

5. PLACE AROUND OUTDOOR TRANSFORMERS AND COMPRESSORS.

Land SHARKS soak up PCB oils around outdoor transformers; drips and leaks from compressors, motors, and other outdoor equipment.

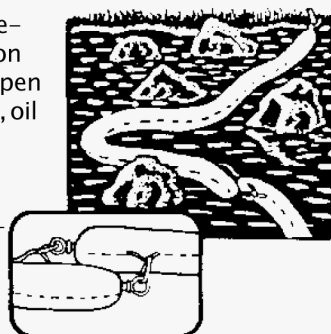

When more than one LandSHARK is needed overlap the ends and strap together with enclosed cable-ties.

6. FAST RESPONSE FOR LARGE SPILLS

The high capacity 10'x8" Whale-BOOM gives you fast absorption and wicking action due to its open mesh skin and water repellent, oil absorbing, pulp filler.

Snap and loops allow easy attachment and boom overlapping.
